•

"I can" statements

*I can graph Sine and Cosine functions

*I can identify the amplitude and period and how it affects graphs.

*I understand how transformations affect graphs.

14.1-Graphing Cosine & Sine Functions

θ	0	$\pi/6$	$\pi/2$	$5\pi/6$	π	$7\pi/6$	$3\pi/2$	$11\pi/6$	2π
$\sin \theta$	0	$\frac{\sqrt{3}}{2}$	1	$\frac{\sqrt{2}}{2}$	0	$-\frac{\sqrt{2}}{2}$	-1	$-\frac{\sqrt{3}}{2}$	0

Sine Graph $y = \sin x$

Unit Circle to Sine Wave

θ	0	$\pi/6$	$\pi/2$	$5\pi/6$	π	$7\pi/6$	$3\pi/2$	$11\pi/6$	2π
$\cos \theta$	1	$\sqrt{3}/2$	0	$-\sqrt{3}/2$	-1	$-\sqrt{3}/2$	0	$\sqrt{3}/2$	1

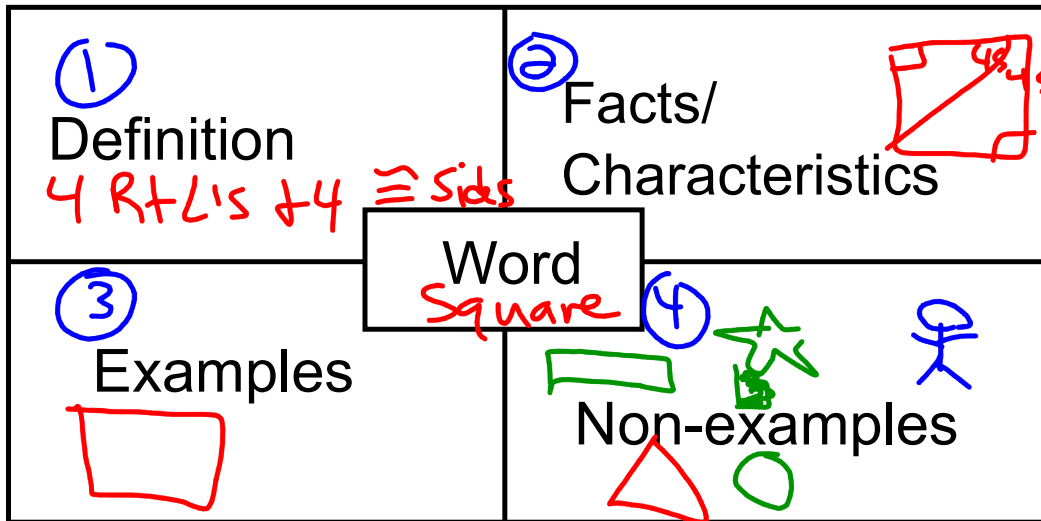

Cosine Graph $y = \cos x$

table

Vocab

Periodic Functions- repeats over a regular intervals of its domain.

Period- length of the interval of the domain over which the graph repeats itself (one cycle).
($\sin + \cos \Rightarrow 2\pi$)

Amplitude- Distance from the center axis to the maximum.

KEY CONCEPT*For Your Notebook***Characteristics of $y = \sin x$ and $y = \cos x$**

- The domain of each function is all real numbers.
- The range of each function is $-1 \leq y \leq 1$. Therefore, the minimum value of each function is $m = -1$ and the maximum value is $M = 1$.
- The **amplitude** of each function's graph is half the difference of the maximum M and the minimum m , or $\frac{1}{2}(M - m) = \frac{1}{2}[1 - (-1)] = 1$.
- Each function is **periodic**, which means that its graph has a repeating pattern. The shortest repeating portion of the graph is called a **cycle**. The horizontal length of each cycle is called the **period**. Each graph shown above has a period of 2π .
- The x-intercepts for $y = \sin x$ occur when $x = 0, \pm\pi, \pm2\pi, \pm3\pi, \dots$
- The x-intercepts for $y = \cos x$ occur when $x = \pm\frac{\pi}{2}, \pm\frac{3\pi}{2}, \pm\frac{5\pi}{2}, \pm\frac{7\pi}{2}, \dots$

Domain: $(-\infty, \infty)$
Range: $[-1, 1]$

Domain: $(-\infty, \infty)$

<http://illuminations.nctm.org/Activity.aspx?id=3589>

Find the amplitude and period.

$$y = a \sin bx$$

$$\text{amplitude} = |a|$$

$$\text{period} = \frac{2\pi}{|b|}$$

$$y = a \cos bx$$

Example 1:

A) $y = \sin \pi x$

$$\text{AMP} = 1$$

$$P = \frac{2\pi}{\pi} = 2$$

B) $y = 3 \cos x$

$$\text{AMP} = 3$$

$$P = \frac{2\pi}{1}$$

C) $y = -2 \cos 3x$

$$\text{AMP} = 2$$

$$P = \frac{2\pi}{3}$$

D) $y = 4 \sin \frac{1}{2} x$

$$\text{AMP} = 4$$

$$P = \frac{2\pi}{\frac{1}{2}} \cdot \frac{2}{1} = 4\pi$$

I. Identify amplitude and period

$$y = a \sin bx$$

$$\text{amplitude} = |a|$$

$$\text{period} = \frac{2\pi}{|b|}$$

Give the amplitude and period.

e.

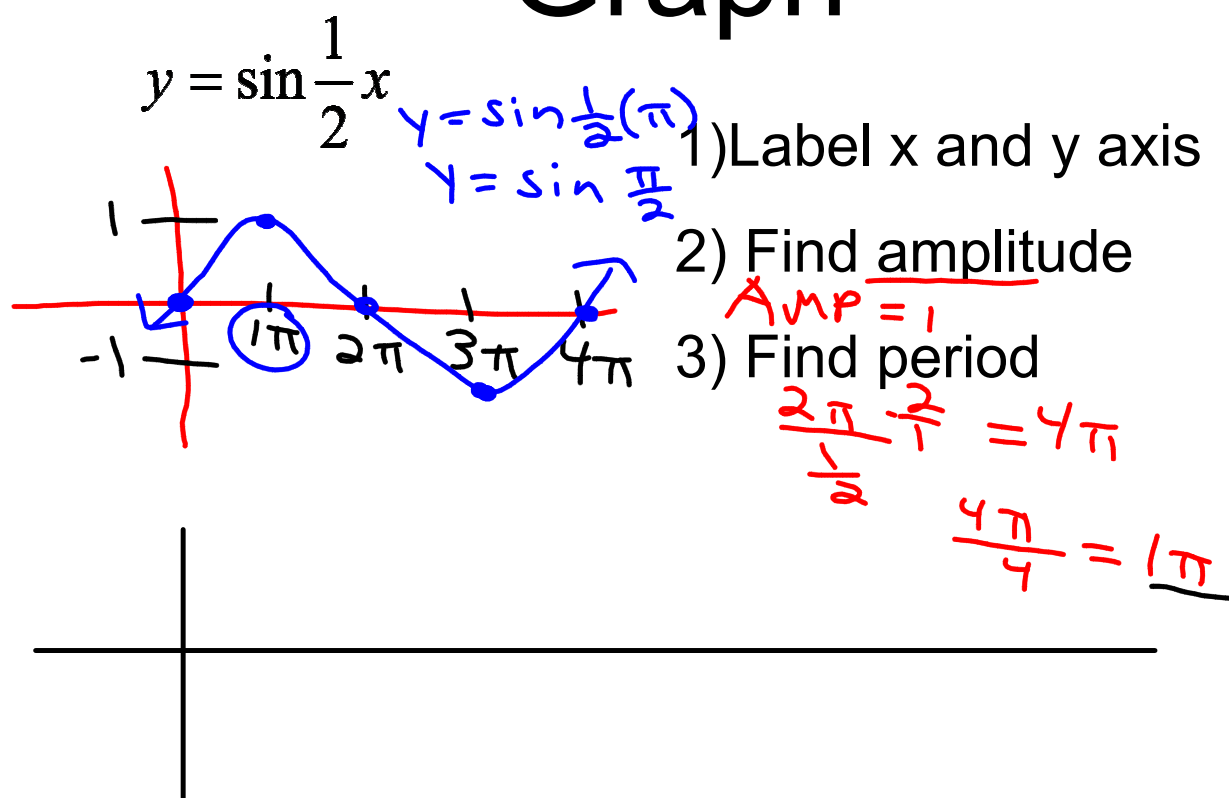

f.

GRAPHING KEY POINTS Each graph below shows five key x -values on the interval $0 \leq x \leq \frac{2\pi}{b}$ that you can use to sketch the graphs of $y = a \sin bx$ and $y = a \cos bx$ for $a > 0$ and $b > 0$. These are the x -values where the **maximum** and **minimum** values occur and the **x -intercepts**.

Graph

GUIDED PRACTICE for Example 1

Graph the function.

1. $y = 2 \cos x$

2. $y = 5 \sin x$

3. $f(x) = \sin \pi x$

4. $g(x) = c$

AMP = 5
 Period = $\frac{2\pi}{1} = 2\pi$
 4 equal parts
 $\frac{2\pi}{4} = \frac{\pi}{2}$

GUIDED PRACTICE for Example 1

Graph the function.

1. $y = 2 \cos x$

2. $y = 5 \sin x$

3. $f(x) = \sin \pi x$

4. $g(x) = \cos 4\pi x$

$$y = 2 \cos x \quad \text{AMP} = 2 \quad \text{Period} = \frac{2\pi}{1}$$

$$\frac{2\pi}{1} = \frac{2\pi}{1}$$

*14.1 Recap ws

2 # 3

$y = \sin 4x$

$P = \frac{2\pi}{4} = \frac{\pi}{2} = \frac{1}{4} = \frac{\pi}{2}$

2

$$\textcircled{3} \quad y = 2 \cos \frac{1}{4}x$$

$$\text{AMP} = 2$$

$$P = \frac{2\pi}{b} = \frac{2\pi \cdot 4}{1} = 8\pi$$

① $y = 3 \cos x$

AMP = 3

$P = \frac{2\pi}{1} = 2\pi$

Hz

Black $y = 3 \cos x$

Red $y = -3 \cos x$

$$(6) y = \sin\left(\frac{2\pi}{3}x\right)$$

$$\text{AMP} = 1$$

$$P = \frac{2\pi}{\frac{2\pi}{3}}$$

$$\frac{2}{\cancel{2}} \cdot \frac{3}{2} = 3$$

$$\begin{array}{l} 4 \\ 3 \end{array} \quad \begin{array}{l} 4 \\ 6 \end{array} \quad \begin{array}{l} 4 \\ 9 \end{array} \quad \begin{array}{l} 4 \\ 12 \end{array}$$

Homework

WS

Warm Up

Graph

A) $y = \cos 4x$

1) Label x and y axis

2) Find amplitude

3) Find period

B) $y = (1/4) \sin \pi x$

HW Questions

Day 2 of Graphing

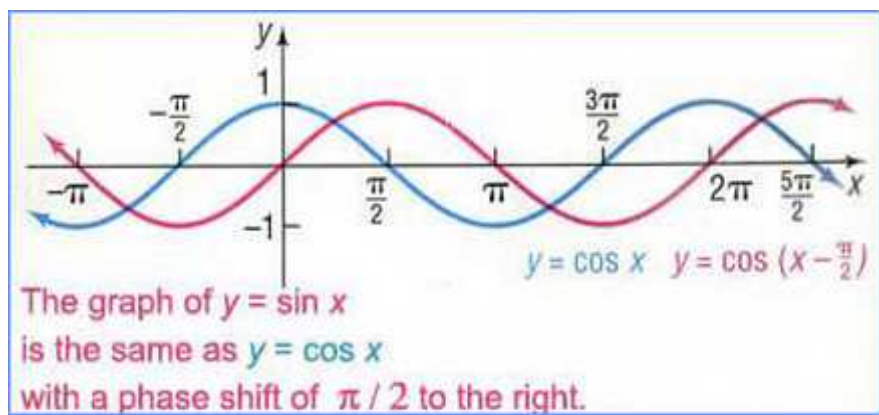

KEY CONCEPT

For Your Notebook

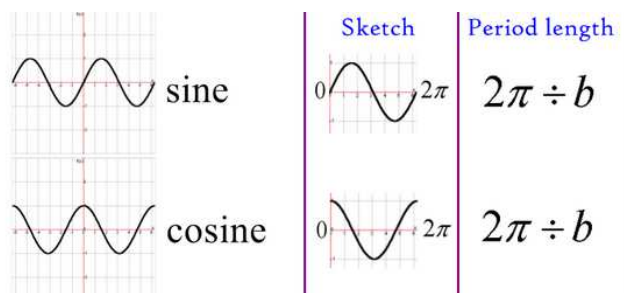

Translations of Sine and Cosine Graphs

To graph $y = a \sin b(x - h) + k$ or $y = a \cos b(x - h) + k$ where $a > 0$ and $b > 0$, follow these steps:

- STEP 1** Identify the amplitude a , the period $\frac{2\pi}{b}$, the horizontal shift h , and the vertical shift k of the graph.
- STEP 2** Draw the horizontal line $y = k$, called the *midline* of the graph.
- STEP 3** Find the five key points by translating the key points of $y = a \sin bx$ or $y = a \cos bx$ horizontally h units and vertically k units.
- STEP 4** Draw the graph through the five translated key points.

* You are going to need two different colored writing utensils.

Finish Practice WS

1. $y = \cos(x - \pi/2) + 3$

$y = a \cos b(x-h) + k$

Amplitude-

Period-

Vertical Shift-

Horizontal Shift-

Maximum-

Minimum-

x-intercepts-

REFLECTIONS You have graphed functions of the form $y = a \sin b(x - h) + k$ and $y = a \cos b(x - h) + k$ where $a > 0$. To see what happens when $a < 0$, consider the graphs of $y = -\sin x$ and $y = -\cos x$.

Notice that the graphs are reflections of the graphs of $y = \sin x$ and $y = \cos x$ in the x -axis. In general, when $a < 0$ the graphs of $y = a \sin b(x - h) + k$ and $y = a \cos b(x - h) + k$ are reflections of the graphs of $y = |a| \sin b(x - h) + k$ and $y = |a| \cos b(x - h) + k$, respectively, in the midline $y = k$.

4) $-3 \sin x$

Amplitude-

Period-

Vertical Shift-

Horizontal Shift-

Maximum-

Minimum-

x-intercepts-

GUIDED PRACTICE for Examples 2 and 3

Graph the function.

5. $y = \frac{1}{4} \sin \pi x$

6. $y = \frac{1}{3} \cos \pi x$

7. $f(x) = 2 \sin 3x$

8. $g(x) = 3 \cos 4x$

15 mins at each station

1) Finish worksheet from last class or work on the extra credit worksheet.

2) **student.desmos.com**
