

## ESOL

### **EL Newcomers**

Students will continue and finish their unit, Think Like a Scientist. We started this unit with basic vocabulary and the Scientific Method before we left for spring break. In order to complete these activities, students will need to check their Google Classroom for my class every day. Mrs. Neves and I will be online Monday through Friday to help assist students with all their classwork, 10-11 am or 1-2 pm. However, they can email and we can schedule a different time as well. Thanks for all of your support at home!

### **EL 2**

As we move forward into April and e-Learning, we are also learning and trying to stay connected with each other and the rest of the world. In this new unit, we are reading articles online about our environmental issues, current updates on COVID-19, and how to stay healthy physically and mentally. We will then choose to investigate in-depth on some environmental concerns, causes & effects, and possible problems & solutions to help us compose an argumentative essay. Please make sure to check our EL-2 Google Classroom daily and manage your time in the most efficient way for our e-learning activities.

### **EL Level 3**

While we are getting used to e-learning, students will be connecting and participating in learning activities that are a familiar part of our class work. Students have daily reading work, academic vocabulary practice, and a digital journal so that we can continue to have regular communication. We will also continue to work on some of the fiction reading & writing we started in March. Please have students check the Level 3 Google Classroom Monday through Friday!
