

ESOL

Newcomer:

Students will continue to work on the Think Like a Scientist unit. Mrs. Neves and I are available every day to help students complete their assignments for all classes. Thanks for your continued support at home during this time of eLearning.

Level 2:

In this final stretch of our school year, we still continue to develop and practice our new reading strategies and writing skills through eLearning. In April, we explored and learned a lot of valuable information on several environmental issues: climate change, the water crisis around the world, and waste management problems, especially with plastic one-time-use products. Moving forward, we will be learning about how to investigate environmental issues we observe in our daily environment. We will learn how to correctly use reported speech in our argument's evidence from various experts online. With all the research, we will practice making strong claims to help compose our argumentative essay on a particular environmental issue.

Level 3:

Students just finished fiction short stories and will be able to choose how they would like to share their stories with peers! During the final few weeks of school, our class will learn about heroes and their achievements by reading biographies, watching videos and completing online activities. I am available every day to support students with any of their classes for eLearning!

We will be sending home students' ACCESS test scores as soon as we can. You may be able to expect them in early June. Ms. Kenney, Mrs. Adams, Mrs. Neves, and Ms. Kraft want to thank you and your students for another wonderful school year. We are sad we will not be able to say goodbye to our students this year. Please stay well during this time, and we will see you again in August!
