

You are invited to participate in the Mason Ridge Science Fair, February 19-21, 2019.

Free registration at <http://tiny.cc/ScienceFair19>

Our fair is optional and exhibition-only (not a competition). The goal is to foster a love of science exploration, not to create a “perfect” project. You can do a formal experiment and write it up, or do a fun science activity as a family and paste photos of the experience onto a display board. ALL PROJECTS ARE WELCOME! SIMPLE, ELABORATE, OR ANYTHING IN BETWEEN! We hope that you will join us in this fun and rewarding celebration of science.

No idea where to start? We have complete science fair kits on myschoolanywhere.com (go to Our Store to select a kit and checkout). These kits contain all of the directions AND materials needed for a simple experiment and display poster, other than the large tri-fold board. You can expect to spend about 2-3 hours total on the experiment and the poster. These kits are a good option if your kids are interested in participating, but the mere idea of science fair feels overwhelming.

If you have any questions or need help with your project, contact Science Fair Chair, Jennifer Rengachary at (314)791-1841 or jrengachary@gmail.com. We LOVE to help!
