

# Burning Video to a DVD

1. Create a name for your finished movie and save it to the same drive you saved your video clips to (E:drive folder).
2. To save your finished movie to a *DVD* you need to open up **Roxio** from your applications window and click on the **DVD-Video** option.
3. After Roxio has opened up, drag and drop your finished movie file onto the checkered part of the screen.
4. Once your finished movie file is in Roxio, save your project to the E:drive folder you created.
5. Finally, click on the **Burn** button at the top of the screen and wait for the DVD to pop out of the disc drive.

Or.....

Using Movie Maker click on the option **Save to CD** from the *Finish Movie* task bar on the left.
